RAILWAY DEPARTMENT

“RAILWAY ACT”

PURSUANT to the provisions of section 7 of the “Railway Act,” being chapter 285 of the “Revised Statutes of British Columbia, 1948,” His Honour the Lieutenant-Governor in Council has been pleased to approve the following certificate, numbered 793, signed and sealed on the 29th day of January, 1952:—

Certificate No. 793.

“RAILWAY ACT”
(Chapter 285, R.S.B.C. 1948)

In the matter of rolling-stock and ever-increasing change from steam-locomotives to diesel-electric locomotives, it is deemed necessary to amend Rules and Regulations, Rule 62, Part 1, Location, Con-

struction, and Clearances, by authority of the provisions of section 289 of the "Railway Act," being chapter 285, R.S.B.C. 1948.

Whereas the resultant stresses from steam-locomotives on rails and structures can be reasonably calculated due to over a century of experience in operation, the effects and stresses set up in rails and structures by the operation of diesel-electric locomotives are not yet fully known, and railways constructed and maintained for steam motive power are at present the proving-grounds for diesel-electrics; consequently, it is not intended to make a final rule but to treat each locomotive on its own merits, bearing in mind that properly controlled speed is a known safety factor.

And whereas diesel-electric locomotives have a different wheel arrangement than steam-locomotives, and as there is no dynamic-augment or unbalance due to counterbalances and rods as used on steam-locomotives, I have approved an amendment whereby heavier axle-loads on diesel-electric locomotives than on conventional steam-locomotives may be considered and approved. A further reason for this change is that diesel-electric locomotives have an even turning moment, whereas steam-locomotives have a fluctuating turning moment which causes impact on the rail; consequently, the load impact resulting from diesel-electric locomotives is considered less than that resulting from steam-locomotives of the same weight.

In conformity with the above, I, Henry Robson Bowman, Minister of Railways of the Province of British Columbia, hereby certify that, pursuant to section 289 of the "Railway Act," I have amended the Rules and Regulations, Part 1, as follows:—

Amend Rule 62, Part 1, by striking out the entire paragraph and substituting the following:—

"(a) *Rails*.—Rails shall be of sufficient weight to carry the equipment. Broken rails must be replaced immediately.

"(b) *Locomotives*.—Where steam or diesel-electric locomotives are used or where motive power other than steam is used, the wheel or axle loadings of such locomotives, motive power, or rolling-stock on any portion, section, or subdivision of a railway shall be approved for operation or movement after due consideration has been given to the following, and the company has made application for approval:—

- "(i) Weight and section of rail with which track is laid;
- "(ii) Physical properties and condition of rail;
- "(iii) Road-bed and type of ballast;
- "(iv) Tie-spacing and condition of ties, and whether or not tie-plates are used;
- "(v) Speed-limit which is subject to approval by the Minister;
- "(vi) Type of locomotives and whether steam, diesel-electric, or otherwise;
- "(vii) Type of trucks, wheel arrangement, and individual axle-loads;
- "(viii) Type of service; common-carrier passenger service or freight only, logging or industrial railway, and whether main line, siding, or branch line.

"(c) *Speed-recorders*.—On common-carrier railways where steel rails lighter than 85 pounds per yard are used, and where passenger-trains are operating over any portion of the same railway so constructed, all locomotives other than steam operating in any type of road service over such portions of railway shall be equipped and maintained with speed tape recorders while so operating and all record tapes shall be filed in the office of the company for perusal by an Inspecting Engineer upon demand; and should conditions warrant, the Minister may order speed tape recorders installed and maintained on any type of locomotive used in any type of service on any railway, but the responsibility for observance of speed restrictions must remain with the railway company."

In witness whereof I have hereunto set my hand and seal this twenty-ninth day of January, in the year of our Lord one thousand nine hundred and fifty-two.

H. R. BOWMAN,
Minister of Railways.

DEPARTMENT OF MUNICIPAL AFFAIRS

"TOWN PLANNING ACT"

PURSUANT to the provisions of section 61 of the "Town Planning Act," being chapter 339 of the "Revised Statutes of British Columbia, 1948," as amended, His Honour the Lieutenant-Governor in Council has been pleased to make the following regulations:—

GOLDEN DISTRICT REGULATED AREA

1. These regulations shall apply to the area as defined in the Letters Patent of the Golden Fire Protection District incorporated under the "Water Act" on October 16th, 1950, and any amendments pertaining thereto, excepting thereout the Northwest Quarter of Section 13, the Fractional South Half of Section 23 lying east of the Columbia River, and the part of Section 24 shown on Registered Plan 1575.

2. The area defined in Regulation 1 is hereinafter called "the area" and shall be known as the "Golden District Regulated Area."

3. There shall be an Inspector for the area appointed by the Minister of Municipal Affairs.

4. The provisions of these regulations shall be enforced by the Inspector.

5. Nothing in these regulations shall require the removal, alteration, or abandonment of, nor prevent continuance of the use or occupancy of, a building existing on January 29th, 1952, unless in the opinion of the Inspector the building or its use constitutes a hazard to the safety of the public, or to the owners of adjacent property, or, in the opinion of the Medical Health Officer, the building or its use constitutes a menace to public health.

Subdivisions

6. The approving officer, as defined in the "Land Registry Act," shall not approve of a plan of subdivision that does not conform to the requirements of Regulations 7 and 8 hereof without the written consent of the Inspector, except where provision for the relaxation of said regulations is made herein.

7. No land shall be subdivided into lots or parcels for building purposes unless:—

- (a) A method of sewage-disposal satisfactory to the Medical Health Officer is possible for each lot;
- (b) Each lot in a Residential district is at least six thousand two hundred and fifty square feet in area and, in addition, is at least fifty feet in width and at least one hundred feet in depth, or in a Commercial or Industrial class district is at least thirty-three feet in width and at least one hundred feet in depth. Where the area which it is proposed to subdivide is of such a shape or the design of an adjoining subdivision is such that in his opinion a variation from such measurements is justified, the approving officer may approve a plan showing such variation;
- (c) Each lot or parcel resulting from the subdivision abuts on a public highway along one full side of said lot;
- (d) The approving officer is satisfied that the subdivision design is suited to the con-

figuration of the land in and about the area which it is proposed to subdivide and to the road plan of adjoining subdivisions:

- (e) All road allowances in the subdivision that, in the opinion of the approving officer, form a part or extension of the major road system are planned to permit a finished grade not exceeding seven per cent, and all other road allowances in the subdivision are planned to permit a finished grade not exceeding twelve per cent;
- (f) Any road allowance in the subdivision that in the opinion of the approving officer forms, or is likely to form, a part or extension of:—

(i) A major traffic road, is at least eighty feet wide;

(ii) A secondary traffic road, is at least sixty-six feet wide; and all other road allowances in the subdivision are at least fifty feet wide. Such minimum widths shall be increased where so required by the approving officer.

Where a proposed subdivision abuts on an existing road, half of the difference between the existing width and the required width, for the class of road as above detailed, shall be provided by land taken from the subdivision; provided that where highway plans or other conditions require a greater width, as indicated by the approving officer, provision for such width shall be made in a similar manner:

- (g) All road allowances are graded and gravelled and all appurtenant works done as required by the approving officer;
- (h) All structures of any kind, including fences, are removed from the road allowances;
- (i) The land is not swamp land and is not subject to intermittent or periodic flooding other than irrigation flooding.

Building Regulations

8. - (b) Not in conformity with the requirements specified in section 12 hereof for new buildings, he may, subject to the approval of the Board of Appeal, order the owner to make such alterations or additions or do anything that may be necessary to bring said building into conformity with these regulations by a date to be specified in the order.

34. The chairman of the Board of Appeal shall have authority to administer oaths to the witnesses on the appeal.

35. In disposing of appeals, the Board of Appeal may make such relaxations of these regulations, or of any order issued pursuant to these regulations, as the Board of Appeal considers necessary to ensure substantial justice, except that a change of classification of any district or part thereof or a change of use permitted in a district may be made only by the Minister of Municipal Affairs on the recommendation of the Board of Appeal.

36. The decision in writing of a majority of the members of the Board of Appeal attending a regularly called meeting shall be the decision of the Board, and the Board shall not be required to readjudicate the same appeal on the same set of facts.

37. Where the decision of the Board of Appeal relaxes any of the regulations herein, it shall be competent for the Inspector to issue a permit or an order conforming to said decision.

2. *Location.*—Any septic or other sewage-disposal tank shall be located outside and be separated from any wall of a dwelling house. Any disposal field or area shall be located as far as practicable from any dwelling, and in no case shall disposal-tiles be nearer at any point than ten feet to any dwelling. No sewage-disposal system shall be so located that it is liable to contaminate any existing domestic water-supply, nor shall it be located under any roadway or traffic-way.

3. *Materials.*—The walls and floors of any septic tank or other sewage-disposal tank shall be of substantial water-tight construction.

Adequate provision shall be made for any condition that may result in a flow of sewage greater than four hundred gallons per day in any dwelling or fifteen gallons per person

per day in any school or similar establishment. When computations or assumptions are made as to the expected flow of sewage, the septic tank shall be sufficiently large to allow a detention period of twenty-four hours, and shall contain in addition a reasonable space for sludge storage.

The depth of the digestion-chamber shall not be less than forty-two inches below the level of the liquid outflow. A space of at least twelve inches shall be provided above the level of liquid outflow, for scum formation and gas escape.

The inlet and outlet pipes shall be of a size not less than that of the sewer served, and shall be so provided with baffle-plates or with inverted sanitary tee-fittings as to prevent any excess turbulence or disturbance of the scum. The outlet baffle or tee-fitting shall extend not less than six inches above and fifteen inches below the water-line. The length of open-joint tiling shall be not less than sixty lineal feet per dwelling in porous soils, and shall be increased in proportion to the number of bedrooms in excess of two and not more than five at the minimum rate of eighteen lineal feet per bedroom.

For schools and similar establishments whose daily requirements are of limited duration, the length of open-joint tiling shall be not less than two hundred and sixty lineal feet.

The volume of the disposal-tile and feeder-pipes shall in no case be less than one hundred and twenty per cent of the discharge volume of the dosing-chamber.

10. *Tile Disposal-field in Impervious Soil.*—No sub-surface sewage irrigation-field shall be constructed in clay or other heavy or impervious soil unless porous filtration media and adequate drainage are provided by removing such impervious soil and replacing it with porous filtering material, such as coarse sand, gravel, cinders, or broken stone, to a depth below the bottom of the disposal-tile of not less than eighteen inches and preferably not less than twenty-four inches.

11. *Size of Open-joint Tile and Method of Laying.*—Ordinary field drainage-tile of a size not less than four inches shall be used. Tiling shall not be laid under any roadway or traffic-way.

12. *Grade of Tiling.*—The open-joint tiling shall be laid at a small uniform down grade not exceeding two inches per one hundred feet.

13. *Lateral Branches of Tiling.*—Lateral branches of open-joint tiling shall be not less than three feet apart, and shall be connected to the liquid-effluent pipe or to a header by sewer-pipe branch fittings. Header-pipes shall be of a quality equal to that required for house sewer-pipes.
